Course name	Level	Tools	Duration	Description	Prerequisite	link		
Linux Mastery: Master the Linux Command Line in 11.5 Hours	Beginner	Linux	11.5 hours on-demand video	-Linux Terminal -Linux File System, -Task Automation and Scheduling, -Package Managers and Software Repositories.	None	https://ftp-software.udemy.com/course/linux-mastery/		
The Complete SQL Bootcamp: Go from Zero to Hero	Beginner	SQL	9 hours on-demand video	MOST POPULAR BEGINNING COURSE - Basic database knowledge and SQL commands Basic understanding about container, use docker to build containers and dev in a container. K8s is optional.	None	https://ftp-software.udemy.com/course/the-complete-sql-bootcamp/		
Docker and Kubernetes: The Complete Guide The Complete dbt (Data Build Tool) Bootcamp: Zero to Hero	Intermediate			Build a dev container to learn dbt - Setting up a data warehouse in AWS Redshift from scratch - Basic Data Warehousing Concepts - Writing server-less AWS Glue Jobs (pyspark and python shell) for ETL and batch processing - AWS Athena for ad-hoc analysis (when to use Athena) - AWS Data Pipeline to sync incremental data - Lambda functions to trigger and automate ETL/Data Syncing processes - QuickSight Setup , Analyses and Dashboards	Linux	https://www.udemy.com/share/101WJM/ https://ftp-software.udemy.com/course/complete-dbt-data-build-tool-bootcamp-zero-to-hero-learn-dbt/		
Data Engineering, Serverless ETL & BI on Amazon Cloud	Beginner	AWS	6.5 hours on-demand video	MOST POPULAR BEGINNING COURSE, COVER THE FUNDAMENTALS OF DATA ENGINEERING. - Data Engineering Essentials related to building Data Pipelines using SQL, Python as Hadoop, Hive or Spark SQL as well as PySpark Data Frame APIs. - Development and deployment lifecycle of Python applications using Docker as well as PySpark on multinode clusters. - Basic knowledge about reviewing Spark Jobs using Spark UI .	- Hands on expertise on Python & Sql is a must - Should have a technical background or prior experience in PySpark (at least beginner level) - Basic understanding of different cloud components (AWS , GCP or Azure)	https://ftp-software.udemy.com/course/data-engineering-serverless-etl-bi-on-amazon-cloud/		
Data Engineering Essentials using SQL, Python, and PySpark	Intermediate	SQL, Python, and PySpark	61 hours on-demand video	- Getting Started with AWS - Development Lifecycle for PySpark - Overview of Glue Components - Using Athena to run Serverless Queries - Cloud Data Warehouse using AWS Redshift - Deploying Data Engineering applications developed using PySpark on job clusters - Using Databricks CLI to manage files, jobs, clusters, etc related to Data Engineering Applications - Spark Application Development Cycle to build Data Engineering Applications - Deep Dive into Delta Lake using Dataframes - Deep Dive into Delta Lake using Spark SQL - File Processing using Spark Structured Streaming leveraging Databricks Auto Loader cloudFiles	Knowledge or working experience with databases and any programming language is highly desired	https://ftp-software.udemy.com/course/data-engineering-essentials-sql-python-and-spark/		
Data Engineering using AWS Analytics Services	Intermediate	AWS	24 hours on-demand video		- Programming experience using Python - Data Engineering experience using Spark - Ability to write and interpret SQL Queries	https://ftp-software.udemy.com/course/data-engineering-using-aws-analytics-services/		
Data Engineering using Databricks on AWS and Azure	Intermediate	AWS and Azure	14 hours on-demand video		- Programming experience using Python - Data Engineering experience using Spark - Ability to write and interpret SQL Queries	https://ftp-software.udemy.com/course/data-engineering-using-databricks-on-aws-and-azure/		
Essential SQL: Azure Data Factory and Data Engineering	Intermediate	Azure	8.5 hours on-demand video	Learn how to construct ELT solutions using Azure Data Factory and SQL Server. Implement various ELT solutions using Mapping Data Flows, Copy Activities, and Stored Procedures. Develop the skills to build and troubleshoot Azure Data Factory pipelines with confidence. Enhance pipeline reliability by mastering the use of parameters to optimize your data workflows. Learn efficient methods for storing and structuring data using Azure Storage services. Understand the distinctive roles played by Azure Data Factory, Data Storage, SQL Server, and Data Bricks in the creation of an ELT solution.	Familiarity with SQL and basic programming skills can be beneficial. Proficiency in programming will be valuable when working with scripting and data transformation tasks Experience in troubleshooting and debugging technical issues will aid in building and troubleshooting Azure Data Factory pipelines.	https://ftp-software.udemy.com/course/essential-sql-azure-data-factory-and-data-engineering/		
Snowflake – The Complete Masterclass	Intermediate	Snowflake	16.5 hours on-demand video	Master all fundamentals & advanced topics Helpful for snowflake certification Build professional-quality understanding of Snowflake Understand the entire Snowflake workflow from end-to end Apply your knowledge in assignments & quizzes hands-on Learn from top-rated instructor and professional BI developer	Basic knowledge of SQL is helpful	https://ftp-software.udemy.com/course/snowflake-masterclass/		
Taming Big Data with Apache Spark and Python - Hands On!	Beginner	Spark	7 hours on-demand video	Use DataFrames and Structured Streaming in Spark 3 Use the MLLib machine learning library to answer common data mini Understand how Spark Streaming lets your process continuous stream Frame big data analysis problems as Spark problems Use Amazon's Elastic MapReduce service to run your job on a cluster Install and run Apache Spark on a desktop computer or on a cluster Use Spark's Resilient Distributed Datasets to process and analyze large Implement iterative algorithms such as breadth-first-search using Spark Understand how Spark SQL lets you work with structured data Tune and troubleshoot large jobs running on a cluster Share information between nodes on a Spark cluster using broadcast Understand how the GraphX library helps with network analysis problems	Python	https://www.udemy.com/course/taming-big-data-with-apache-spark-hands-on/		
The Complete Hands-On Introduction to Apache Airflow	Intermediate	Airflow	5.5 hours on-demand video	Create plugins to add functionalities to Apache Airflow. Using Docker with Airflow and different executors Master core functionalities such as DAGs, Operators, Tasks, Workflow Understand and apply advanced concepts of Apache Airflow such as The difference between Sequential, Local and Celery Executors, how Use Apache Airflow in a Big Data ecosystem with Hive, PostgreSQL, Install and configure Apache Airflow Think, answer and implement solutions using Airflow to real data processing Python, basic understanding of pipeline		https://www.udemy.com/course/the-complete-hands-on-course-to-master-apache-airflow/		

Mastering Data Visualization: Theory and Foundations [2022]	Beginner	No tools	5 hours on-demand video	Learn to design effective data communication Improve your plots up to a professional level Learn to choose and design the appropriate plot for your purpose Learn to create compelling graphs that do not lie Learn to avoid the traps your data can fall into Learn to distinguish between good, bad and wrong visualization Learn the golden rules on Graphical Excellence, Integrity and Sophistication Learn the most common crimes in plotting to be able to avoid them!	No previous knowledge	https://www.udemy.com/course/mastering-data-visualization/		
Microsoft Power BI Desktop for Business Intelligence	Intermediate	Power BI	10.5 hours on-demand video	Build professional-quality business intelligence reports from the ground up Blend and transform raw data into beautiful interactive dashboards Design and implement the same B.I. tools used by professional analysts Showcase your skills with two full-scale course projects (with step-by-step instructions) Understand the business intelligence workflow from end-to-end Learn from a best-selling instructor and professional BI developer	Excel Power Query, Power Pivot & DAX	Microsoft Power BI with Desktop Training Course Udemy		
Apache Kafka Series - Learn Apache Kafka for Beginners v3	Beginner	Kafka, WSL, Linux	8.5 hours on-demand video	Understand Apache Kafka Ecosystem, Architecture, Core Concepts and Operations Start a personal Kafka development environment Master Concepts such as Topics, Partitions, Brokers, Producers, Consumers				
Prefect				Workflow Orchestration				
Airflow				Able to write dags and perform retry, logs, monitoring, integrate with AWS services.		https://www.udemy.com/course/the-complete-hands-on-course-to-master-apache-airflow/
